

SE 4200: Web Application Development II

Assignment: Express

Requirements

- Implement the [previous assignment](#) using the [Express](#) framework.
- All assignment requirements should be fully implemented using features provided by the Express framework, with the exception of your simple data store (this should be implemented, but not using framework features).
- Include a copy of your documentation from the previous assignment. No changes should be necessary.

Resources

- Use the Express [documentation](#) to guide your implementation.

Submission

1. Submit your project using Git and GitHub. Start by creating a repo for this assignment [here](#).
2. Show your completed assignment to the instructor during class or office hours to receive credit.
