5-1 Relationship Transferability

Objectives

This lesson covers the following objectives:

- Describe and give an example of relationship transferability
- Understand the difference between transferable and nontransferable relationships
- Illustrate nontransferable relationships on ERDs

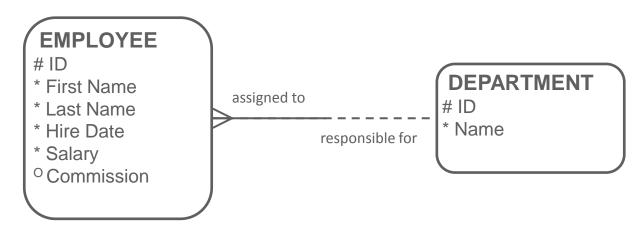

Purpose

- Once a class has been allocated to a teacher, can that class later be transferred to another teacher, possibly in midsemester?
- Usually yes, because if not, what would we do if the original teacher becomes sick?
- Some health clubs allow memberships to be transferred from one person to another, but other health clubs don't.
- This business rule is normally determined by what is most efficient and most profitable for the club.

Relationship Review

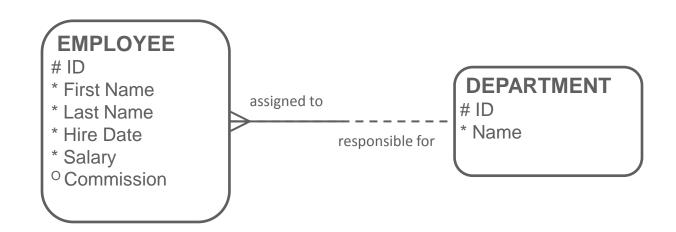

- Let's review a simple relationship between EMPLOYEE and DEPARTMENT.
- Optionality:
 - Must every EMPLOYEE be assigned to a DEPARTMENT?
 - Must every DEPARTMENT be responsible for an employee?

Relationship Review

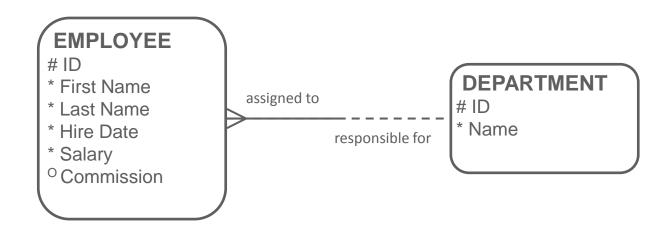

- Cardinality:
 - How many EMPLOYEEs can a DEPARTMENT be responsible for?
 - How many DEPARTMENTs can an EMPLOYEE be assigned to?

Relationship Review

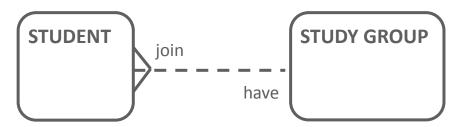

- Transferability:
 - Can an EMPLOYEE be transferred from one DEPARTMENT to another DEPARTMENT?

Relationship Transferability

- Transferable: A STUDENT being allowed to move from one STUDY GROUP to another.
- There is a relationship between STUDENT and STUDY GROUP that is transferable.

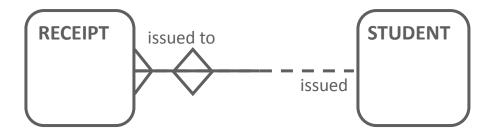

Transferable Relationship

Relationship Transferability

 Nontransferable: A STUDENT can be issued a RECEIPT for paying tuition fees, taking a certification exam, or purchasing items at the bookstore. Once a RECEIPT has been issued, it cannot be transferred to another STUDENT.

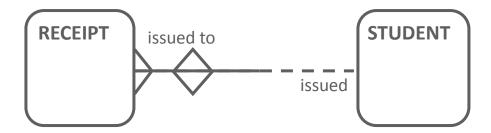

Nontransferable Relationship

A nontransferable relationship is represented with the diamond on the relationship.

Relationship Transferability

 If it was issued in error, it would have to be cancelled, and another RECEIPT would have to be written up. The relationship between STUDENT and RECEIPT is nontransferable.

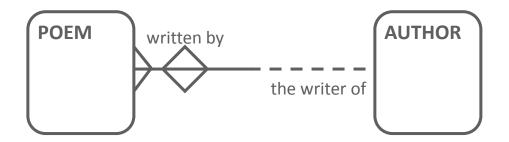

Nontransferable Relationship

A nontransferable relationship is represented with the diamond on the relationship.

More Nontransferable Relationships

 Ownership of a POEM belongs with its AUTHOR. Authorship is a relationship that cannot be moved to another person.

Terminology

Key terms used in this lesson included:

- Nontransferable
- Transferable

Summary

In this lesson, you should have learned how to:

- Describe and give an example of relationship transferability
- Understand the difference between transferable and nontransferable relationships
- Illustrate nontransferable relationships on ERDs
