

CS 4600: Senior Project

Project Introduction Presentation

Assignment

Present your project to the class. Share the high points about your project and why it is important or interesting.

Prepare 3-5 slides as a PDF document that you will use in your presentation. Use 3 minutes to present in class. You should practice your presentation ahead of time to be sure you can fit the important information in that time. Your presentation must be a PDF file. If you want to use external resources, such as short video clips, post them publicly and link them from the PDF file.

Presentations will be on January 23, 25, and 30. You must be present all days, regardless of the day of your presentation.

See your assigned presentation day and time in Canvas/Files/Schedules.

Grading

The presentation must be submitted as a PDF by the due date to receive any credit. You must attend all presentation days to receive any credit. To receive full credit, the presentation must take between 2.5 and 3.5 minutes; it must clearly communicate the need for your project, the planned features, and the intended technical resources.

Submission

Upload PDF of the presentation to the Canvas assignment, by 11:59 pm on January 22.
